4. Rationale for Altering or Establishing Position

We have experienced extreme difficulty in finding a classified Systems Analyst I to fill our vacant position. Persons eligible for such a position do not wish to leave the Hartford area, where almost all of the classified Systems Analyst jobs are located. Also, the probability of finding a classified Systems Analyst I who has any experience at all in educational institutions is extremely low. We quickly exhausted the Systems Analyst certification list and have been informed by the State Personnel Office that it will require approximately six months to prepare another list.

The conversion of this position to unclassified status gives us a greatly improved chance of filling the position promptly with a suitably qualified person. It also gives us greater latitude in assigning duties to the person filling this position. About 90% of the persons with whom the Analyst/Programmer would work outside of the Computer Center in researching the development of application systems would be unclassified employees. Precedent for this arrangement has been set by the other State Colleges where unclassified persons have been placed in comparable positions.
