### **CSCU Computer Science Transfer Pathway**

Not all community colleges offer any or all of the courses that are required in the pathway. This pathway document lists existing courses at the community colleges. The computer science work group approved the current pathway with the understanding that community college computer science faculty will modify or create courses where necessary. The Framework and Implementation Review Committee recommends that the pathway be moved forward for endorsement votes on the campuses with the understanding that periodic updates will be made and that, before the pathway becomes available for students for the fall of 2017, community college faculty will work to develop or modify courses as necessary. For the 2017/18 academic year, the following 9 community colleges will offer the computer Science pathway: CCC, GCC, HCC, MCC, MXCC, NCCC, NVCC, QVCC, TRCC

#### Changes

The CSCU Pathway Transfer A. A. Degree: Computer Science Studies was approved by the BOR during AY 2016-17 and first made available to students for AY 2017-18.

• 08/29/2017: Added course numbers to MCC transfer degree requirements: CSC 127, CSC 128, EET 252, CSC 121, and CSC 114).

Changes 10/24/2017:

- Updated ECSU program to reflect changes made beginning Fall 2017. These changes to the ECSU program do not
  affect the community college portion of the pathway.
- Added full lists of community college courses to all CSU templates no change in program requirements.

Changes 12/11/2017

- SCSU: page 21, line 31 course changed from CSC 153 to CSC 229 Object-oriented Programming; page 22, line 38, course changed from CSC 335 to CSC 235 Web and Database Development
- GCC: CSC 223 name corrected to Java Programming I throughout
- HCC: Updated course offerings
