

21st Century Classroom Initiative **LEARNING SPACES**

January 2016

 RED THREAD

every space is a **LEARNING SPACE**

creating an active learning community

Learning occurs everywhere, from the classroom to the commuter lounge – students and teachers are finding new ways to collaborate, communicate, and engage in learning. Rapidly changing technology continually offers new and diverse approaches to teaching and learning. From digitized content to interactive technologies, education often defines the cutting-edge use of technology.

21st Century Classrooms are designed to be environments that are *flexible, mobile, and designed to support active learning*. They allow educators and students opportunities to leverage space in unique and purposeful configurations, allowing greater academic content exploration, idea creation, and interactivity.

The ConnSCU 21st Century Classroom project is committed to providing **insight-led solutions** that bring active learning to life across campus.

Traditional Classroom - Small | CL-1

65" Smartboard

Mobile teacher station supported with active posture stool

Freestanding electrical access hubs to charge personal electronics

Wall track, moveable whiteboards

▲ Lecture/Discussion Layout

Ergonomic swivel chairs, personal table area with support for tablet devices, cup holder and personal storage below seat

Wall-mount and portable white boards on easels support content creation and review

OVERVIEW

Footprint: 27' x 20' | 540 SF

Students: 24

Concept:

This traditional small active learning space accommodates lecture, discussion and group work. Mobile furniture offers flexibility for various classroom layouts. Numerous wall-mounted and portable whiteboards support brainstorming, documenting ideas and information persistence. File cabinets provide storage for ongoing projects and reference materials. A laptop VGA/HDMI/USB connects directly to the 65" interactive Smartboard to share content, control applications at the board and annotate over visuals using a digital stylus. System on/off and volume control for the built-in speakers are accessible at the front of the board. Students have easy access to power for their personal devices using Thread, a desk-height power distribution solution. For optimal viewing, the furthest participant is positioned no more than 20 feet from the screen.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

TIMELINE

Total Weeks = 16

Traditional Classroom – Tiered | CL-2

OVERVIEW

Footprint: 34' x 21' | 714 SF

Students: 36

Concept:

This space is ideal for technology-based lectures displaying content on dual 70-75" flat screens at the front of the room. The adjustable-height tables are set to create tiered seating for optimal sightlines. The instructor can share computer content on the dual displays from the lectern. Computer audio is distributed through ceiling-mounted speakers. A Crestron button panel controls system power and volume levels. The teacher's desk offers an alternative seated location to the lectern, but without the ability to share content or access the control system. An assisted listening system provides audio support for hearing-impaired students. For optimal viewing, the furthest participant is within 18 feet of the screen.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning

TIMELINE

Total Weeks = 16

Traditional Classroom – Large | CL-3

Wall-mount and portable whiteboards on easels support content creation and review

Lectern, computers, document camera, rack and button controller

Ceiling-mounted projector and 130" motorized screen

Mobile instructor desk with document camera and active posture stool

▲ Lecture layout

Ergonomic swivel chairs offer personal storage below the seat

Rolling chevron-shaped tables which gang together, support personal whiteboard use

OVERVIEW

Footprint: 35' x 45' | 1,575 SF

Students: 60

Concept:

This large traditional active learning space accommodates lectures, discussions and group work. Mobile furniture offers flexibility for various classroom layouts. Numerous wall-mounted and portable whiteboards support brainstorming, documenting ideas and information persistence. At the lectern, the instructor can share digital content from a desktop, laptop and document camera via a ceiling-mounted LCD projection system onto an 130" diagonal motorized screen. Computer audio is distributed through ceiling recessed speakers. The button panel controls source selection and volume levels. An assisted listening system provides audio support for hearing-impaired students. For optimal viewing, the furthest participant should be within 30 feet of the screen.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities
- Online/Hybrid Courses

Flipped Classroom | CL-4

Movable dividers for individual critical thinking sessions with minimal distractions

Wall mount and desk mount whiteboards support content creation and discussion

Thread, work surface height electrical outlets

Mobile teacher desk with active posture stool

Swivel chairs at height-adjustable tables support ergonomics

Rolling chevron-shaped tables gang together with personal whiteboards & in-table material storage

Comfortable lounge furniture encourages informal interactive discussion

Dual 70-75" flat screen display

OVERVIEW

Footprint: 35' x 45' | 1,575 SF

Students: 35

Concept:

The flipped classroom is a pedagogical model in which the typical lecture and homework of a course are reversed. Textbook readings or short video lectures are viewed by students before the class session, while in-class time is devoted to exercises, projects, and discussions. The active learning space supports individual and group work, and mobile furniture offers flexibility for various classroom layouts. Whiteboards support brainstorming, documenting ideas and information persistence. The instructor and students share digital content onto dual 70" flat screens from two HDMI/VGA wall/floor inputs. The button controller selects the source, display destination, and audio levels distributed through recessed ceiling speakers. An assistive listening system provides audio support for hearing-impaired students. Students have easy access to power for their personal devices using Thread, a desk height power distribution solution. For optimal viewing, the furthest student is within 18 feet of the screen.

LearnLab – Mobile | CL-5

Whiteboards for content creation

Locking storage units for materials

70-75" flat screen

Mobile teacher lectern with active posture seating

media:scape mobile with 42" displays for content sharing

Ergonomic height-adjustable swivel chairs support students of all sizes during long sessions

Adjustable-height tables set at tiered heights for flexibility

OVERVIEW

Footprint: 30' x 28' | 840 SF

Students: 24

Concept:

The mobile LearnLab is a collaborative active learning environment based on four key principles:

- *Triangulation of presentation display* placement provides equal viewing of content from all areas, enabling teaching from anywhere in the room
- *Vertical surfaces* support information persistence and maximize display area
- *Seamless transitions* between learning modes (lecture, group, independent) while maintaining cognitive flow
- *Square room design* with central door access utilizes the corners of the room

Four mobile 42" display media:scapes each support up to 6 laptop connections for democratic content sharing. Mobile media:scape and tables can be rearranged on the fly and adjusted for standing or seated heights. The teacher can move about freely to facilitate class group work or share computer/audio content onto a wall-mounted 70-75" flat screen display with built-in speakers. System is controlled by a wall-mount button panel.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

TIMELINE

Total Weeks = 16

Blended Library Space | CL-7

OVERVIEW

Footprint: 54' x 53' | 2,900 SF

Students: 40 **Seating Capacity:** 80

Concept:

Blended learning is the combination of face-to-face instruction and group work in the physical classroom with online teaching and learning. This classroom supports in-person instruction, group collaboration and individual study. During formal instruction, the teacher is positioned at a mobile desk in the center of the space and can share and annotate over laptop content on a 84" interactive flat screen. Group work zones comprised of casual study lounges or huddle areas are important to place adjacent to meeting rooms in wide corridors or alcoves to support break out. Huddle spaces have curved tables and single laptop connections to a flat screen display. Students looking for heads-down focus can choose to work at the desking zone or the private lounge seating. The Privacy Wall enclave with a standing height media:scape and a 42" flat screen is ideal for project team work or small group collaboration. The instructor has control of shutting down all systems from one Crestron button controller. There is no centralized audio distribution.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

The blended classroom applications represent many settings of today's transformed library spaces.

Progressive Library Lab | CL-8

OVERVIEW

Footprint: 54' x 53' | 2,900 SF
Students: 40 **Seating Capacity:** 80

Concept: The progressive library lab supports technology driven collaboration, combined with a host of individual study settings. The TeamStudio is an active project team space that fosters democratic content sharing with individual 10 connections and 3 displays for viewing. The acoustically separated lounge space created with VIA wall consists of a media:scape lounge, 6 AV connections, stools to perch at ledges and movable seating cubes. Small groups, located at the café booths, can connect to 23" wall mounted flat screens. An intimate private distance learning zone utilizes a 23" flat screen with USB camera/microphone and internet based videoconferencing. For individual study and critical thinking, partially enclosed lounges and adjustable height work surfaces, wrapped in high panels, provide privacy, while the café-style booths and open benching offer visual and audio accessibility. When technology is not needed, small groups can meet in the semi private cul-du-sac. All technology displays automatically power on/off by source detection.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

Maker Space | CL-9

Wall-mounted or table-attached whiteboards support story boarding

Rolling whiteboard supports group discussions

media:scape mobile enables content sharing

Rolling storage for easy access to materials

Large and height-adjustable work surfaces

Height-adjustable swivel seating supports all sizes of students for long sessions

OVERVIEW

Footprint: 40' x 25' | 1,000 SF

Students: 22

Concept:

From 3D printing to bio-medical technology, Maker spaces are emerging to facilitate self-directed experimentation and collaborative problem-solving across a range of disciplines. Maker spaces allow students to be tactile, exploring ideas from their brains to their fingertips. The environment is comprised of large, sturdy work surfaces in a variety of shapes and heights, rolling and fixed storage for materials, and hanging/rolling whiteboards for storyboarding and documenting ideas. By incorporating the media:scape mobile, project work can be shared remotely using a portable video document camera.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

*Optional not shown - craft board covers for large surfaces are recommended to allow cutting/gluing/welding activities

▲ Plan view

Total Weeks = 16

Simulation Lab | CL-10

OVERVIEW

Footprint: 33' x 44' | 1,452 SF

Students: 6-30

Concept:

The Simulation Lab is designed to accommodate lecture, hands-on learning of medical diagnostics, procedures and debriefings. Simulation labs includes these spaces:

- *Lecture* – takes place in the instructional classroom setting with mobile tables and chairs. Instructor shares digital content and videos onto dual large displays.
- *Simulation* – small groups of students engage in simulation activities using medical mannequins. Ceiling microphones & cameras used for recording.
- *Control Booth* – a technician uses a reference monitor and touch control system with video camera controller to record simulation for live streaming or archiving. Headset/mic is used to communicate with students during simulation.
- *Debriefing* – students and teachers view recordings and reflect on performance of how they applied theory to practice in large group or intimate settings.

Learning/Teaching Styles:

- Active Learning
- Collaborative Learning
- Experiential Learning
- Problem-Based Learning
- Learner-Centered Teaching
- Learning Communities

Distance Learning – Satellite Classroom | SH-1

Demountable wall enclave (Privacy Wall)

Room scheduling device

Wall-hung and integrated marker boards

Dual 32" displays

media:scape can be specified at seated or standing height.

Ergonomic swivel chairs, height adjustable supporting all size students for long sessions.

OVERVIEW

Footprint: 12' x 15' | 180 SF

Students: 6-10

Concept:

This space accommodates technology-based remote learning and connects with Teacher Pods SH-2, Distance Learning Classrooms SH-3, and other distance learning systems. The demountable wall system creates a self-contained space with visual and acoustical privacy within an open environment. The media:scape with dual 32" flat screens support presentations and codec-based remote participation. System includes a Codec, 12x camera, microphone and multiple-input switcher. Videoconferencing lighting will optimize far end viewing of local room participants. The media:scape can be specified at desk or standing height. The demountable wall is easily reconfigurable, providing flexibility for the future. A room scheduling system allows space to be reserved for classes, group work and study sessions, maximizing utilization.

Distance Learning Classroom | SH-3

70" flat screen display

LCD projector and motorized screen

70" flat screen display

Projection system

70" flat screen display confidence monitor

High resolution precision cameras (instructor and student)

Fixed curved tables with electric outlets at the worksurface

Ergonomic height-adjustable loose swivel chairs support students during long sessions

OVERVIEW

Footprint: 30' x 28' | 840 SF

Students: 50

Concept:

This space is designed to accommodate lecture-based teaching and distance learning. Visual sight lines, specialized lighting and acoustical treatments achieve optimal visual and auditory performance. At the custom lectern, the instructor selects sources and display destinations, launches video calls and shares content using the touch control system. The near-end camera/content and remote camera/content are displayed on dual 70" flat screens and to the ceiling mounted projector/motorized screen. The instructor has a 70" confidence monitor to mirror visual content on the main projection screen. Two high resolution cameras provide far-end viewing of instructor and students. Wireless and gooseneck microphones for the instructor and ceiling microphones for students provide local and remote speech reinforcement. An assisted listening system provides audio support for hearing-impaired students.

Distance Learning –Formal Presentation Layout

Ergonomic height-adjustable
swivel chairs supporting students
of all sizes during long sessions

Mobile flip-folding tables and
stacking chairs can be stored in
adjacent space when not in use

OVERVIEW

Footprint: 30' x 30' | 900 sq. ft.

Students: 32-60

Concept: This space provides ultimate flexibility for active and distance learning with multiple furniture and technology applications.

Distance Learning:

During distance learning, a formal presentation layout provides optimal sightlines using dual 70" flat screens for near end and far end viewing of content and students. Distance learning technology includes microphones for speech reinforcement, pan/tilt/zoom camera(s), integrated codec and digital sound processing.

Active Learning (local participants only):

Mobile tables and chairs can be reconfigured from lecture to group work. Four groups of students have access to the 70" dual displays and the two 60" flat screens on stands. Layouts include formal presentation, conference discussion and team collaboration.

An assistive listening system provides audio support for hearing-impaired students.

Learning/Teaching Styles:

Lecture Hall | SH-5

OVERVIEW

Footprint: 44' x 38' | 1,672 SF

Students: 70-90

Concept:

The space is designed to accommodate lecture-based teaching, optimizing sightlines for digital content on multiple displays. This comfortable and dynamic environment consists of fixed tiered, curved tables with surface-height electrical outlets and swing-away fixed seating. At the lectern, the instructor uses a touch control system to select sources and destinations for content sharing onto the large projection screen and large displays. The instructor can share any input source to any or all displays. Speech reinforcement is supported by gooseneck and wireless lapel microphones and a distributed ceiling speaker system. Video, audio and data are integrated for live streaming or archived for video on demand. An assistive listening system provides audio support for hearing-impaired students. Additional loose seating and open area at the floor level offers seating for handicapped accessibility.

Auditorium | SH-6

High performance 13K lumen projection system and tracking camera (not shown)

20 foot diagonal motorized screen

Speaker array sound system

Custom movable lectern
SMART podium to house
rack, microphones and
control system.

Fixed, partially
reclinable seating

OVERVIEW

Footprint: 52' x 72' | 3,744 SF
Students: 500

Concept:

The auditorium is the largest formal space on campus for students to gather for public address, guest speakers or special events. The space is designed with comfortable fixed, partially reclining seating. A high performance projection system displays content from computer sources or a Blu-ray player onto a 20 foot diagonal motorized screen. A SMART Podium interactive pen display at the lectern allows presenters to easily control and annotate over live computer displayed content. For "TED Talk" style presentations, a tracking camera and recording device will integrate video, audio and data for live streaming or archived for video on demand. A 48" confidence monitor on a mobile stand will connect at the front riser of the stage. The audio from program sources and wireless microphones are distributed through a front and side array speaker system. An assistive listening system provides support for hearing-impaired students. A touch-unified control system is integrated into the movable lectern and at the control booth or behind the stage.

Theater | SH-7

Surround-sound system

High performance 13k lumen projection system and tracking camera (not shown)

20 foot diagonal motorized screen

Fixed seating is partially reclinable seating

Custom movable lectern to house rack, microphones and control system

OVERVIEW

Footprint: 55' x 53' | 2,915 SF

Students: 243

Concept:

The theater is designed for live music, drama productions and digital/video presentations. Comfortable fixed, partially reclining seating accommodates 240 students. A high performance LCD projection system displays content from computer sources or a Blu-ray player onto a 20 foot diagonal retractable motorized screen. Audio from program sources and microphones are distributed through a high fidelity surround-sound system. A communication system and 6 wireless belt packs allows theater technicians to interface with wall speaker systems to support talent readiness, lighting, staging and sound operators. An assistive listening system aids hearing-impaired students. A tracking camera and recording device will integrate video, audio and data for live streaming or archived for video on demand. A touch-unified control system is integrated into the movable lectern and at the control booth or behind the stage.

Commons Café | SH-8

OVERVIEW

Footprint: 60' x 109' | 6,480 SF

Students: 300+

Concept:

The Commons café space is designed to accommodate dining, socializing, small and large group meetings and presentations with a variety of settings a places to charge personal devises. Applications include intimate café tables, booths and group tables with various seating postures and color for visual interest. The audiovisual system will distribute content from 3 CATV tuners, a digital signage source and a laptop computer to the video wall, two sets of dual 55" displays on both sides of two column, and a single 90" display.

A wall-mounted touch panel or iPad can select any source to be viewed on one or more displays. CATV audio will be heard at low volume through the display's built in speakers. During large formal presentations, the projector and 180" diagonal motorized screen will provide additional visual reference. Voice reinforcement and computer audio are distributed through recessed ceiling speakers. A tracking camera and recording device will integrate video, audio and data for live streaming or archived for video on demand. An assistive listening system aids hearing-impaired students.

Learning/Teaching Styles:

55" Display

65" Display

55" Display

Support spaces adjacent for storage and work areas

Charge Bar for standing height collaboration

Small group booth lounge

Tech Bar destination supports technology questions and device repairs

Semi-private lounge areas for collaboration or "being alone in a group"

OVERVIEW

Footprint: 56' x 50' | 2,800 SF

Students: 100+

Concept:

The Tech Café allows students and staff to get their technology questions answered in a comfortable setting while multi-tasking. Casual settings include stool height tech bar, standing height group table, booths and lounge seating. System will consist of a 65" display flanked by two 55" displays. The center display will run off a dedicated computer for general messaging to students (tips and tricks, wait times, hours of operations). Music will be distributed through ceiling speakers. Students' laptops can connect to the 55" displays to view diagnostics and troubleshooting during their consulting session. In the four booth, student laptops or tablets will connect to 23" flat screen displays.

Meeting Room | SH-10

65" Flat screen display

FlexFrame wall system, supports flat screens, codecs, storage, shelves and whiteboards

Cardioid boundary flush mount microphones (not shown)

Task seating, with the latest technology and ergonomics

Wood conferencing table with recessed cable management and power/cable access in the table leg

OVERVIEW

Footprint: 14' x 19' | 266 SF

Students: 6-8

Concept:

The meeting room is intended to be utilized by leadership and administration for presentations and audio conferencing. The seating, table and FlexFrame wall system create a quality and technology optimized space. The seating incorporates the latest technology and ergonomics, while the conferencing table has a recessed cable management system and access for power and cables within the table leg. Laptops will connect at the table to share content on a 65" flat screen mounted on the wall system. Six Cardioid Boundary microphones will be installed flush to the table surface for audio conferencing. Computer audio and far end audio will be distributed through ceiling speakers. System power, source selection, audio dialing and volume control are all controlled by a 8" wireless touch panel.

Optional:

Videoconferencing capabilities can be added to the system. A Cisco camera/Codec would reside on the shelf of the wall system, under the flat screen. The touch panel design will accommodate videoconferencing dialing, camera control and source selection.

Not Shown- wireless touch panel, ceiling speakers and optional videoconferencing

CAMPUS-WIDE SYSTEMS

Room Scheduling System
Digital Signage
AV Monitoring System
Blue Jeans Videoconferencing
Kaltura MediaSpace

Room Scheduling System | CW-1

OVERVIEW

Concept:

A scheduling system manages open and private collaborative spaces effectively for planned and maximum utilization.

Spaces can be reserved at the device located at each space or through Microsoft Exchange or similar enterprise wide calendar system.

The scheduling system can generate reports on occupancy, room usage and reservation patterns to provide insight into space utilization.

TECHNOLOGY PRODUCTS

(see Appendix A)

Control Systems:

Steelcase Roomwizard
or Crestron 7" Wall-Mount Touch Screen
software and owner furnished servers required

BUDGET PRICING

(see Appendix B – Budgetary Parameters & Appendix C – Construction Costs)

AV Technology: \$18,800.00

*Budget based on 5 scheduling devices with Microsoft Outlook Integration.

TIMELINE

Total Weeks = 12

Digital Signage / Wayfinding | CW-2

OVERVIEW

Concept:

Digital signage is an enterprise wide solution that allows you to create and distribute content to display across the campus.

Content Management - Create, edit, approve and schedule your messages to dedicated flat screens across the campus from a central web-based interface.

Optional Data Integration - Import dynamic content from Facebook, Twitter, RSS and ATOM feeds, calendars.

Scalability - System can have one or more channels, each with an independent "slide show" of content. Players and receivers can easily be added to the system for additional display.

TECHNOLOGY PRODUCTS

(see Appendix A)

Display: 65" Flat Screens
Control Systems: Digital Signage Server, Players and Receivers

BUDGET PRICING

(see Appendix B – Budgetary Parameters & Appendix C – Construction Costs)

AV Technology: \$44,000.00

* Budget based on 5 display locations. Aggregated unit estimate is \$8800 per display. Excludes data integration.

TIMELINE

Total Weeks = 12

AV Monitoring System | CW-3

OVERVIEW

Concept:

Supporting faculty 24/365 with immediate response to tech support requests, the AV monitoring system a powerful asset management software tool that enables you to keep track of all the AV systems across the campus.

The dashboard is well designed interface that provides a complete listing of all systems and locations with graphics indicators reflecting projector power status, lamp life, alerts and other vital statistics. The system sends alerts and notifications if the system loses power or is disconnected from the network.

This tool minimizes unproductive time AV support staff spends traveling to each system to check room status, manually view and record projector lamp life, provide in-person help to users, and turn off systems one by one at the end of each day.

TECHNOLOGY PRODUCTS

(see Appendix A)

Control Systems:

Creston RoomView
or Extron Globalviewer
software and owner furnished servers required

BUDGET PRICING

(see Appendix B – Budgetary Parameters & Appendix C – Construction Costs)

AV Technology:

\$16,800.00

* Budget is based on monitoring 15 campus AV systems

* Meetings with IT staff on network compatibility will be required before final quoting and deployment.

TIMELINE

Total Weeks = 12

BlueJeans Video Conferencing | CW-4

Distance Learning

Guest Lecturers

Virtual Office Hours

Student Study Groups

Synchronous & Asynchronous Learning

Faculty & Staff Interviews

OVERVIEW

Concept:

Blue Jeans videoconferencing is here to transform the way that your institution runs, helping students learn, faculty members teach and staff collaborate. All you need is a camera and Internet connection to join a professional-grade video interaction.

Top Uses of Blue Jeans in Education:

- 1. Hybrid Classes:** students join courses in person for portions and online via Blue Jeans for other portions. This can include co-teaching initiatives with faculty across multiple campuses.
- 2. Extended Office Hours:** professors make themselves available to students after hours when both parties typically aren't on campus
- 3. Student Study Groups:** students work on group projects from anywhere; popular scenarios include quick sync-ups and off-hour meetings, particularly with grad students who are more likely to live off-campus
- 4. Staff / Faculty Collaboration:** department meetings, administrative meetings, and software trainings are often held over video
- 5. Faculty & Staff interviews:** early-round interviews for faculty and C-Level positions are conducted via Blue Jeans to cut on travel expenses
- 6. Student & Faculty Recruiting:** Leverage the power of video to expand your outreach and create that intimate interaction that help sells your institution to prospects with virtual campus tours

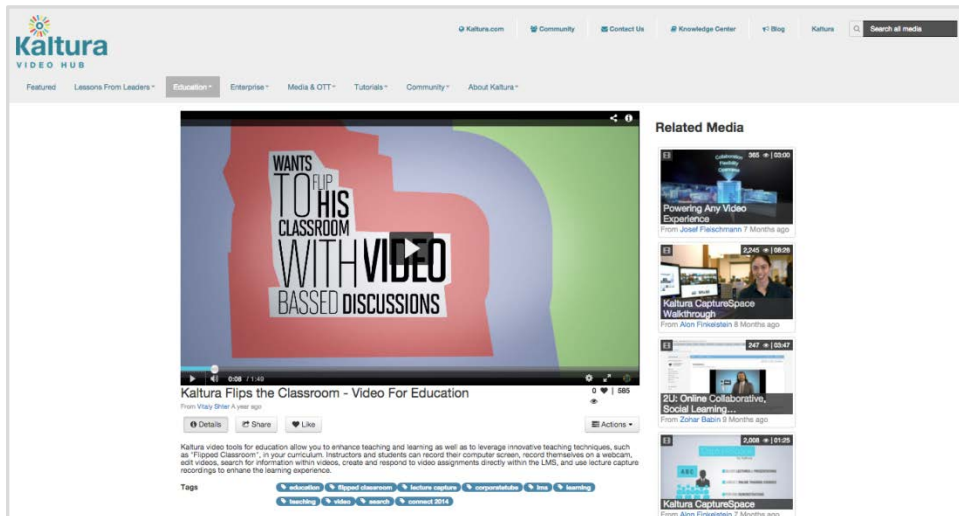

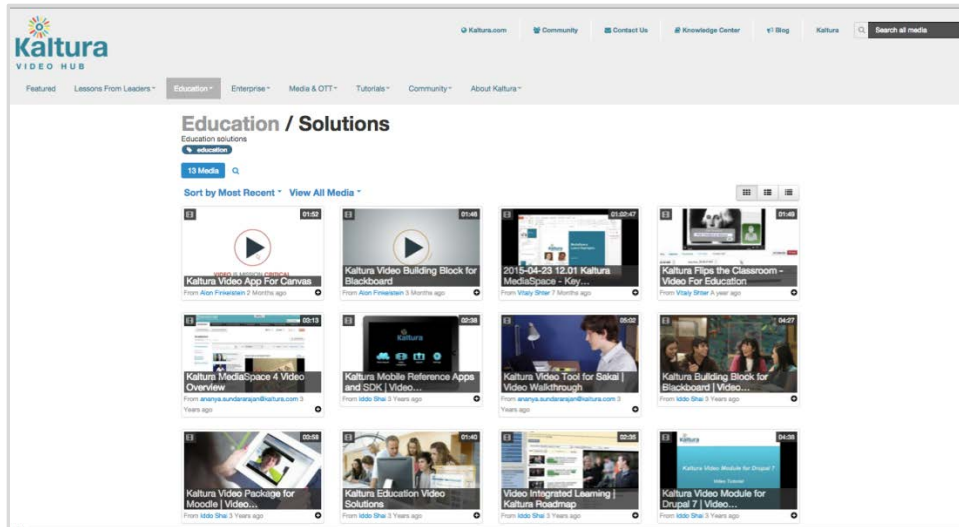

Devices Supported

Web browser, Desktop App, iOS, Android, Conference Room Systems, Phone Dial-in

Access:

Unlimited meetings, minutes, recording and storage for anyone on campus. Visit connscu.bluejeans.com today to get started!

Kaltura MediaSpace™ | CW-5

OVERVIEW

Concept:

Using MediaSpace, your campus can securely create, upload, share, search, browse, and watch both live and on-demand videos, presentations, and other rich media content anytime anywhere.

MediaSpace provides superb cross-device user experience, unmatched user engagement capabilities, and powerful control and governance tools.

In higher education, MediaSpace encourages community and collaboration through the power of online video. MediaSpace empowers everybody on campus from librarians, marketing, communications, Cabinets, and the mobile student to create, share, comment, and learn with video.

Kaltura MediaSpace is available on campus today. Contact Bill Krysinski (bkrysinski@charteroak.edu) to learn more.

Appendix D | Warranty

Steelcase Limited Lifetime Warranty for Americas

PAGE 2 of 2

WARRANTY DOES NOT APPLY TO PRODUCT FAILURE OR LOSS RESULTING FROM:

- Normal wear and tear
- Failure to apply, install or maintain products according to published Steelcase or manufacturer instructions and guidelines
- Abuse, misuse, or accident
- Alteration or modification of the product
- The substitution of any unauthorized non-Steelcase components for use in the place of Steelcase components in an integrated product solution; such substitute components include but are not limited to worksurfaces, leg supports, panels, brackets, shelves, overhead bins and other integral components.

WARRANTY DOES NOT COVER:

- Replacement parts are covered for 2 years or the balance of the original warranty, whichever is longer (excluding certified refurbished products).
- Products considered by Steelcase to be consumables (e.g., batteries, bulbs/lamps, except projector lamps offer 6 months coverage)
- Variations occurring in surface materials (e.g., matching grains, textures and colors across dissimilar substrates and lots).
- Select Surfaces, Steelcase Health Graded-In and Custom Surfaces are not covered, except as warranted by the original supplier, for material properties including, but not limited to, quality, colorfastness, shade variations, puddling, wrinkling or abrasions
- Warranty excludes Custom Surfaces that COM testing has deemed to be unsuitable for upholstery on our products.
- Steelcase textiles purchased through the cut yardage program are warranted for defects in manufacturing of the material.
- Coalesce® has an independent warranty.

WARRANTY PROVIDES EXCLUSIVE REMEDIES:

Pursuant to this limited warranty, if a product fails under ordinary use as a result of a defect in materials or workmanship, Steelcase will (i) repair or, at Steelcase's option, replace the affected product at no charge, with a new or refurbished product of comparable function, performance and quality or (ii) refund the purchase price for the affected product if repair or replacement is not commercially practicable or cannot be timely made.

- A product "defect" means an inadequacy in the materials or workmanship of the product that (i) existed at the time when you received the product from Steelcase or a Steelcase Authorized Reseller and (ii) causes a failure of the product to perform under ordinary use in accordance with the materials and documentation accompanying the product.
- An "ordinary use" means use of the product (i) in conformance with all applicable local, state or federal laws, codes and regulations (including without limitation building and/or electrical codes) and (ii) in accordance with manufacturer recommendations and/or instructions in the materials and documentation accompanying the product.
- A "Steelcase Authorized Reseller" means any dealer that (i) is legally permitted to conduct business in the jurisdiction where the product is sold, (ii) is duly authorized by Steelcase to sell the product, and (iii) sells the product new and in its original packaging.

THIS LIMITED WARRANTY IS THE SOLE REMEDY FOR PRODUCT DEFECT AND NO OTHER EXPRESS OR IMPLIED WARRANTY IS PROVIDED, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. STEELCASE SHALL NOT BE LIABLE FOR ANY CONSEQUENTIAL, INDIRECT, SPECIAL, PUNITIVE OR INCIDENTAL DAMAGES.

Warranty is non-transferable and valid only for the original purchaser acquiring a product from Steelcase or a Steelcase Authorized Reseller for the purchaser's own use and not for resale, remarketing or distribution.
