#### Unrestricted Electives:\* **3 credits**

#If you have not taken Physics in high school, you should use this elective to take PHY 110 Introductory Physics.

\*You are free to choose any courses at or above 100-level to complete unrestricted electives, although you may need to use some these credits to take a math course that prepares you for the required level of math in your program. You should also consider using unrestricted electives to begin work on completing a minor. Central Connecticut State University will require that you complete a minor by earning at least 18 credits in

one area outside your major field; you must complete at least 9 of those minor credits at Central. You can also complete other General Education requirements for Central, Southern and Western Connecticut State Universities—but not Eastern Connecticut State University. Your advisor will help you to determine which courses to select.

**CSCU Pathway Transfer Degree: Physics Studies, A.A. Credit Total: 61 credits**

**In order to graduate and be guaranteed admission to a State University, you must earn an overall 2.0 grade point average.**
