

CT Preschool through Twenty & Workforce Information Network (P20 WIN)

DATA REQUEST DOCUMENT

This form and all attachments are to be submitted to the P20 WIN Data Governing Board for consideration and approval before the execution of each Data Request.

Information provided here is required to fulfill the mandatory provisions for written agreements according to the Family Educational Rights and Privacy Act (FERPA), 20 U.S.C. §1232g and to comply with Unemployment Compensation (UC) considerations under state (CGS § 31-254) and federal (20 CFR 603) law. PERSONS WHO ARE NOT STATE GOVERNMENT EMPLOYEES OR OFFICIALS MAY NOT HAVE ACCESS TO UNIT LEVEL WAGE DATA.

SECTION 1 – BASIC DATA REQUEST INFORMATION

1.a Application Submission Date: 7/6/17

1.B TYPE OF SUBMISSION: Initial Application Continuation* Modification** Repeat

*Initial applications are approved for a given duration. Select 'continuation' if this request is to extend that timeframe.

** If you are requesting a modification to a request that has already been approved and is underway, select 'Modification' and address only the sections of this form which are being adjusted from the prior request.

1.c P20 WIN Data Request Number: P20W_1707_3_0016

1.d Data Request Title: New Postsecondary Wage & Employment Outcomes – Cicu-IRPS

1.e Agencies from which data is being requested (Check all that apply):

State Department of Education CSCU UCONN Cicu-IRPS Department of Labor

1.f Has this Data Request been discussed with program employees at the involved agencies?: Yes No

If yes please indicate with whom:

Agency: DOL

Name: Andy Condon, Dana Placzek

Agency: Cicu-IRPS (CCIC)

Name: Jen Widness, Russ Adair

Agency:

Name:

2.a Name (last, first) Andrew Condon

2.b Title Director of Office of Research

2.c Organization Connecticut Department of Labor

2.d Mailing Address 200 Folly Brook Boulevard, Wethersfield 06109

2.e Email Address Andrew.condon@ct.gov;

2.f Phone Number 860-263-6255

2.g Provide Full name, institution, email address, and project role for ALL other persons working with data, derived data or data output for this project. Add additional space as necessary. Please print and attach a signed Confidentiality Agreement for each individual needing access to the resultant data set. (See Attachment C)

Jennifer Widness, President, cicu-IRPS; widnessj@theccic.org

aMaura Provencher, Vice President of Research & Administration, cicu-IRPS; provencher@theccic.org

Andrew Condon, Director of Research and Information, Department of Labor; Andrew.condon@ct.gov

Dana Placzek, Research Analyst, Department of Labor; Dana.placzek@ct.gov

Liam McGucken, Research Analyst, Department of Labor, liam.mcgucken@ct.edu

SECTION 3 –ALIGNMENT OF PURPOSE& SCOPE

3.a Provide a brief summary of the Data Request:

This data request will enable analysis of the degree to which students completing credentials from postsecondary institutions that receive public funds in CT are working in Connecticut and out of state after program completion. It will provide data that will enable institutions to evaluate the ability of specific education programs to provide a living wage for graduates. The data will also provide insight into the impact of state financial aid and demographic distinctions on employment and wage outcomes.

The analysis will examine employment rates and wages earned by students completing undergraduate education programs for institutions within the Connecticut Conference of Independent Colleges (CCIC/Cicu-IRPS), by individual institution, by academic program using Classification of Instructional Program (CIP) codes, by degree level (certificate through Bachelor's), by IPEDS demographic categories, by gender, by financial aid status, by CT residency, and by year from 2009-10 through the current academic year as data are available from source systems. Wage records will be available through the most recent quarter received by CT DOL at the time of the data match.

Data will be gathered, analyzed and provided in reports as described below on an annual basis for three years. Each year an additional year of postsecondary graduates and employment data will be available.

In addition, this data request will utilize the United States Department of Labor Wage Record Interchange System 2 (WRIS 2), which enables states to obtain limited wage and employment data from other participating states. By leveraging this system, DOL anticipates being able to identify a more accurate number of individuals who are employed from each institution and cohort than has been achieved in the past.

3.b Clearly state the purpose of this request and describe how the purpose is an audit or evaluation of federal or state supported education program(s) (See Audit or Evaluation Exception 20 U.S.C. 1232g(b)(1)(C), (b)(3), and (b)(5) and §§99.31(a)(3) and 99.35).

All Cicu-IRPS institutions receive both federal and state support. Through this data request, staff will be able to evaluate the effectiveness of public postsecondary programs in preparing students for employment in Connecticut. This data request is intended to support a broad number of evaluation questions including but not limited to the following:

- Are education programs helping minority students achieve employment and wage outcomes comparable to non-minority students?
- Does the distribution of state financial aid support equality in postsecondary outcomes?
- To what degree do education programs support employment in Connecticut? To what degree are students who are Connecticut residents finding employment in the state?
- Is there an economic advantage to completing different degree types (e.g. certificate, Assoc., BA)
- Which education programs are most likely to provide a living wage after program completion?
- Which education programs are effective at increasing wages for working adults?
- Do education programs lead to similar levels of employment for students from all geographic regions in the state?

3.c Describe the benefit that this audit/evaluation will provide to a local or State Education Authority or Agency (34 C.F.R. 99.1) and the state of Connecticut. Note requests that only provide audit or evaluation of non-state Participating Agencies will not be approved.

The state, federal government and citizens invest heavily in postsecondary education so that individuals can prepare themselves to be productive tax paying citizens. It is in the interest of the state to understand whether students completing publically funded programs are entering the workforce in CT. Since private non-profit institutions of higher

education receive Title IV funding, it is in the interest of the State of Connecticut to understand whether these education programs are producing a functionally diverse and well-prepared workforce to meet labor demands. It is in the interest of everyone, including taxpayers, to understand the degree to which students receiving state and federal financial aid are able to find employment anywhere as well as within the state after completion. Results from analysis conducted on this joint data request will provide information useful for improving education programs and policies across the state.

3.d Provide a brief description of the method for analysis.

Descriptive statistics (e.g. counts, percentages, averages, medians, standard deviations) will be used to determine employment and wage variance over time for the state as a whole, by institution, by degree level (e.g., certificate, associate's, bachelor's, etc.), by education program (e.g., CIP code), by IPEDS race/ethnicity categories, by gender, by residency (e.g., CT resident, Non-CT resident), by location of employment (e.g., in-state, out-of-state), by funding status (e.g., Pell recipient, Governor's scholarship recipient) and by academic year (e.g. 2009-10 through 2015-16) as data are available. Additional factors may be included in the evaluation as appropriate. See Attachments A & B for all possible factors.

As a part of the matching process, the CT Department of Labor will utilize Connecticut's agreement with the United States Department of Labor Wage Record Interchange System 2 (WRIS 2), which enables states to obtain limited wage and employment data from other participating states. Data from this system must remain at the CT DOL and cannot be released on an individual level to Cicu-IRPS. Only aggregated data about employment and wage outcomes that includes out-of-state data will be available to anyone outside of CT DOL.

3.e Provide a description of the documents or reports that will reference data from this Data Request. For each report, indicate the audience for the report and expected indicators or measures to be included in each.

Data will be used by Cicu-IRPS institutions to determine the number of graduates that stay in state upon graduation, over time, and the effectiveness of their programs. Data may be shared with the legislature and the Planning Commission for Higher Education upon request and upon approval of Cicu-IRPS member institutions. Such reports may include:

- Number and percent of graduates who completed training/education
 - Number and percent of graduates who entered employment in Connecticut
 - Number and percent of graduates who were retained in employment for a period of time
 - Average wages upon entering employment in Connecticut
 - Change in weekly wages earned prior to and after graduation
 - Employment and earnings after graduation for multiple years at the institution levels by Program of Study using Classification of Instructional Program (CIP) codes and Degree Type (e.g. Certificate, Associate's, Bachelor's).
 - Average wages and changes in wages for graduates over time by program and degree type
 - Employment rates and changes in employment rates over time by program and degree type
 - Disaggregation by race, ethnicity and gender
 - Aggregations by higher education sector, institution, CIP code (2-, 4- and 6-digits), degree type, demographic category, financial aid status, state of residence, or industry
 - Other key attributes valuable for evaluation such as program persistence, time to completion, and the age of the student.
- At a minimum, DOL will provide cicu-IRPS with data tables that include the same measures as were produced for Data Request P2OW_1310_3_0003 using additional years of graduates.

The audience for reports produced will include: Cicu-IRPS member institutions, and, upon request and approved by Cicu-IRPS member institutions, the state legislature and The Planning Commission for Higher Education.

DOL will produce data tables with a set of common measures for Cicu-IRPS that mirror what they will produce for the University of Connecticut and the CT State Colleges and Universities as defined by data request P20W_1707_235_0014. These measures will be helpful to institution leadership and other stakeholders who need comparative data about postsecondary outcomes for education programs in CT. **See the attached spreadsheets** for a detailed description of the data tables that CT DOL will produce for CSCU and UCONN. All data in these reports will be aggregated to avoid disclosure of personal information before publication.

Data will be used to produce public reports to the extent that such information could help students, families and school personnel in the selection of postsecondary academic programs. Public reports will be based on data that has been made available to the legislature or the institutions themselves. In most cases, public reports will be a subset or further aggregation of other more detailed reports. All data in public reports will be aggregated to avoid disclosure of personal information.

3.f In addition to utilizing a minimum cell size as documented by the Data Governance Procedure, identify/describe the statistical methods that will be used to minimize the risk of re-identification of PII for data to be published. Some typical methods are listed below; however, this list is not comprehensive. Options should be used in combination for maximum security. See the [USED Technical Brief 3](#) as a resource.

- **Suppression by:** cell, row, sampling (present data for a portion of students: e.g. 80%)
- **Blurring through:** aggregation of groups, rounding, use of ranges, use of top/bottom categories (e.g. 'less than 5%, greater than 95%),
- **Perturbation:** data swapping, adding noise, use of synthetic data

Suppression and blurring will be the primary approaches used to protect personally identifiable information (PII) and minimize the risk of re-identification. In most instances cells containing or referring to a count of less than six will be suppressed along with the cell with the next to smallest value.

Additional strategies may be used including providing multiple year averages and/or incorporating ranges of counts or groups of programs for key data points where there is extensive suppression due to small cell sizes. For cells that contain wage or employment data which has been aggregated across three years (12 quarters), at least 6 people must be found working in the given time period in order to report wages for the group. If there are more than 6 people working, but not all of them are counted as having 'stable earnings', then there must be a count of 3 individuals to show earnings.

Calculations of wages earned will be based upon a model of 'stable earnings' from the US Census Bureau which further minimizes the risk that actual earnings might become known. With this method, individuals will be counted in wage calculations if they meet a standard of having 'stable earnings.' An individual is determined to have stable earnings in a given quarter (t) if the individual also had earnings in the prior quarter (t-1) and the quarter after (t+1). Because there is a strong possibility that the number of individuals employed in a given quarter will not equal the number of individuals whose wages are counted using the definition of stable employment, this further minimizes the possibility of disclosing actual earnings.

SECTION 4 – PROTECTION OF CONFIDENTIALITY

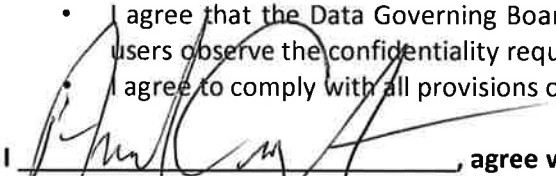

4.a By what date will the datasets and all paper or electronic copies will be destroyed by the requestor?

After the Approved Requestor has received data files and the matrix of generic unique identifiers, the Approved Requestor has 12 months to complete analysis and destroy the data files. Note that the Data Governing Board may set a shorter or longer time frame before the data files must be destroyed, and this 12 month limitation may be extended with written approval from the Data Governing Board. Requestors need to submit the Query Management Document as a 'continuation' for approval of an extension.

All unit record data resulting from the query to the system will be destroyed by the Department of Labor within 48 months of the date of the receipt of the analytical data set from the Cicu-IRPS or by **August 31st 2019** - whichever is later.

4.b With the addition of your signature at the bottom of this section, indicate that you agree to each of the following statements:

- I will only utilize the data received through this Data Request to meet the purpose as described. The approval given to receive data through this Data Request does not confer approval to use it for another purpose.
 - I will not re-disclose the data received through this Data Request approval process to any public official who has not been authorized by the Data Governing Board to receive it, and who has not also signed a Persona Statement of Confidentiality and Non-Disclosure.
 - I will take the necessary and appropriate precautions to safeguard personal information and will comply with all state and federal laws concerning the safeguarding and disclosure of such information.
 - I will not use the datasets to re-identify individuals.
 - I agree that approval to receive data does not convey ownership of the data.
 - I agree that prior to the public release of any documents or reports generated from this Data Request I will supply all reports or documents to the Data Governing Board for review and verification that the intended purpose has been adhered to.
 - I agree to store all resultant data, in print or electronic form, in a locked receptacle that can be accessed by authorized persons only.
 - I agree to store all resultant data on secure desktop computers and in secure files to which access is restricted to authorized persons only.
 - I agree that no resultant data may be transmitted via email or placed or stored on a mobile computing or storage device. For purposes of this agreement, a definition of "mobile computing device" includes, but is not limited to, notebooks, palmtops, PDAs, iPods®, Blackberry® devices, and cell phones with internet browsing capability. A "mobile storage device" includes but is not limited to, mobile computing devices, diskettes, magnetic tapes, external/removable hard drives, flash cards (e.g., SD, Compact Flash), thumb drives (USB keys), jump drives, compact disks, digital video disks, etc.
 - I agree to destroy all confidential information obtained through this agreement as soon as such information is no longer needed.
 - I agree that the Data Governing Board will be allowed access to monitor all authorized users to ensure such users observe the confidentiality requirements of the information obtained under this Agreement.
- I agree to comply with all provisions of the P20 Win Data Request Management Procedure.

 , agree with each of the statements in section 4.b.

SECTION 5—ADDITIONAL INFORMATION

5.a Provide any additional comments that would be useful to the Data Governing Board in considering this request.

SECTION 6 – SIGNATURE OF REQUESTOR AND DATE

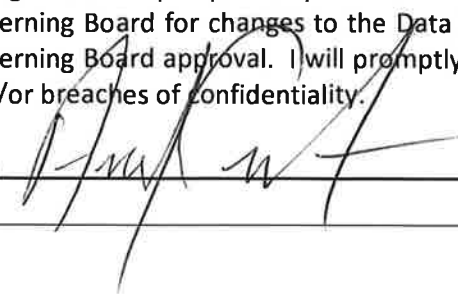

6.a Signature of Requestor

I understand that the entities that are providing data to P20 WIN (hereinafter Participating Agencies) have made reasonable efforts to ensure that the data available through P20 WIN are up-to-date, accurate, complete and comprehensive at the time of disclosure. These records reflect data as reported to the Participating Agencies by their data-submitting organizations for the reporting period indicated. Changes or updates to the data may occur

after the time of disclosure and may affect data that have previously been made available. The Participating Agencies are not responsible for data that are misinterpreted or altered in any way. Derived conclusions and analyses generated from this data are not to be considered attributable to the Participating Agencies or the participating organization(s) from which the data originated.

I certify that the information supplied in this form, with attachments, is complete, accurate. The analysis will be conducted according to the protocol approved by the Data Governing Board, applicable federal, state and local laws regarding the protection of education records and unemployment insurance records. I will ensure that all protocol changes will be prospectively reviewed by the Data Governing Board. I will request approval from the Data Governing Board for changes to the Data Request and will not implement proposed changes until I receive Data Governing Board approval. I will promptly report to the Data Governing Board any related complaints, problems, and/or breaches of confidentiality.

Signature

A handwritten signature in black ink, appearing to be "J. M. [unclear]", written over a horizontal line.
