

## Protocol for awarding credit to multiple transcripts for TAP students

Students frequently complete credits at multiple institutions or through multiple means, such as Veteran's Experience, CLEP and AP, as part of their degree requirements. A transfer audit and then a graduation audit determine how these credits meet degree requirements. In the case of TAP students, the community college graduation audit will generally determine the awarding of credit. The CSUs and COSC will generally honor the community college determination and not re-audit multiple transcripts or sources of credit for purposes of the transfer or graduation audit. The CSUs and COSC may make adjustments to how courses are received if those adjustments are in the best interests of the student completing program requirements in a timely manner.
